FLUTTER DEVELOPER

ABOUT ME

Flutter developer with experience in designing and developing user-friendly e-commerce platforms and subscription-based applications. Skilled in creating efficient admin dashboards, implementing location-based features, and integrating online payment options. Strong focus on seamless user experiences, inventory management, and staff organization. Excited to contribute expertise to new projects and drive success.

WORK EXPERIENCE

Flutter Developer

Friggitello Automation LLP / Udupi / Jul 2022 - Present

- Designed and developed a comprehensive e-commerce platform using Flutter, providing a user-friendly shopping experience with location-based product display, online payment options, and delivery choices.
- Developed an efficient admin dashboard with features such as product and category management, order tracking, payment verification, and inventory management with customizable settings.
- Implemented auto-fill of customer address based on the location selected, and enabled the admin to set delivery areas based on pin codes.
- Designed and developed a subscription-based application that provided graphs and charts, inventory management, staff management, and budget management to users.
- Created a seamless and user-friendly interface that allowed users to easily navigate and utilize the app's features.
- Developed a system for managing inventory, allowing users to track and monitor their products, and view inventory data through the use of graphs and charts.
- Implemented a staff management system, enabling users to manage their staff through the app, view staff data, and create schedules.
- Created a budget management system that allowed users to manage their finances, track expenses, and view budget data through the use of graphs and charts.
